The Lifestyle Quiz

The Lifestyle Quiz is a stand-alone activity that works with students from undergraduate to doctoral candidates. It is easily incorporated into any discussion about possible career paths and futures. I recently employed the quiz with a class of student teachers, asking them to think about what their responses might mean for their career planning. We had not planned for this to become an open discussion, but the following week that’s what happened!

The quiz is contained within a two page handout.

SELF-ASSESSMENT

Career decisions have an enormous impact on one’s daily life. The quiz will get you thinking about the lifestyle choices that could make you happy and productive. Any answer could be right for you, but some choices might work better than others in certain jobs and careers.

Some of your expectations and requirements may change as the years go by, and others will be more consistent. So take the quiz to learn a little more about yourself and how your career might become a ‘good fit’. You may be surprised.
